Response Document-Final.docx

Good Afternoon John:

In keeping with our telephonic agreements, please find enclosed herewith, the U.S. Department of Energy, Richland Operations Office response to your August 22, 2012 "Records Request." Please note that some of the attachment items are multipage embedded digital files, only the first page of which appears when you first scroll to its viewing location. If you double click on the first page of the embedded document, the full document should open in Adobe Reader for you. If you have any problems opening any of the embedded files, let me know and I'll send the file to you in a separate e-mail.

We also invite you to take a look at the "Clarifying Comment" section referred to by footnote 1, and which appears following responses to request number 10. This section is intended to help any reader of the enclosed response document understand U.S. DOE's view of how CERCLA applies to much of the work undertaken on the Hanford Site, and how Hanford's

unique geography and physical security affect the choice of signage employed at our Environmental Restoration Disposal Facility (ERDF).

Also note that I will be sending a hard copy of what is contained in this e-mail via first class U.S. Mail within the next couple of weeks. Should you have any questions, please don't hesitate to give me a phone call.

Regards,
Dale Jackson

P.S.

Dale McKenney informs me he is just about finished with the scenario development for use during your October 18th visit, and we should be able to provide that information to you in the next day or so.
